

REMARKS

In the Official Action issued June 6, 2005, the Examiner indicated that the application was in condition for allowance except for certain formal matters, namely the need to insert the serial number of Applicant's copending application on page 18 and to eliminate the conflict between use of the numeral 130 for both "face plate" and "positioning plate".

This amendment adds the serial number to page 18 as requested.

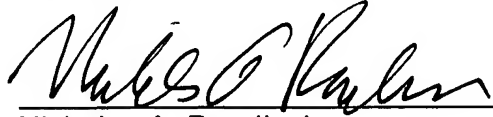

As for the second objection, the terms "face plate" and "positioning plate" were used interchangeably to identify the same component, so that use of the numeral "130" in relation to both terms was correct. Nevertheless, in the interest of expediting prosecution, Applicant has elected to amend the specification by substituting "positioning plate" for "face plate" wherever the latter term occurs in the original specification.

It is believed that the changes to the specification are all correct and do not introduce any new issues.

In view of the foregoing specification amendments and the cancellation of non-elected claims 1-11, it is believed that the application is now in condition for issuance of a formal notice of allowance. Therefore, prompt and favorable reconsideration is solicited.

If any fee is required in connection with this matter, please charge the same to Deposit Account No. 16-0221.

Respectfully submitted,

Nicholas A. Pandiscio
Attorney for Applicant
